PROFESSIONAL SUMMARY

Passionate and self-driven Indie Android App Developer specializing in creating lightweight, user-centric, and viral mobile utilities using Java and Kotlin. Experienced in end-to-end mobile development using Android IDE environments to design, build, and publish modern mobile applications. Proven track record of launching viral tools like "PromptMast AI" that solve real-world user needs with clean UI and high performance.

TECHNICAL SKILLS

- **Programming Languages:** Java, Kotlin
- **Core Competencies:** Android App Development, Mobile IDE workflows, XML Layout Design
- **Tools & IDEs:** Android Studio, Mobile App Build Studios (AIDE / Alternative Mobile IDEs)
- **App Deployment:** APKPure, Third-Party App Stores, APK Packaging
- **APIs & Integrations:** AI Prompt Engineering, RESTful APIs, JSON Parsing

FEATURED PROJECTS & APPS

PromptMast AI — Android Utility Application

Platform: APKPure | Tech Stack: Java, Kotlin, Android SDK

- Developed and published an innovative AI-driven prompt utility application designed for fast and effective prompt generation.
- Designed a lightweight, responsive user interface ensuring zero lag across a

wide range of low-end and high-end Android devices.

- Managed the complete product lifecycle independently—from conceptualization and UI design to testing, APK generation, and deployment on APKPure.
- Successfully drove organic user adoption and virality by targeting high-demand AI workflows and optimizing mobile performance.

=====

WORK EXPERIENCE

=====

Independent App Creator & Developer
Self-Employed / Indie Developer | 2024 – Present

- Conceptualized, engineered, and shipped viral utility apps tailored to mobile-first users.
- Utilized mobile-based IDE environments and Android toolchains to rapidly prototype, debug, and ship production-ready applications.
- Optimized application architecture for minimal APK file size, fast startup times, and reduced memory usage.
- Handled community feedback, bug fixes, and continuous updates across app deployment platforms.

=====

KEY STRENGTHS

=====

- **Viral Product Sense:** Identifying trending digital utilities and quickly shipping functional MVPs.
- **Autonomous Execution:** Ability to handle UI/UX, logic programming, debugging, and deployment entirely solo.
- **Resource Optimization:** Building high-performance mobile apps within lightweight and resource-constrained environments.
